

TREASURE SORTERS

Gemtumbler 2

Assembly Instructions — keep for future reference (and for the next dragon).

TIME

30 minutes

PEOPLE

1 dragon

DIFFICULTY

2 of 5 claws

TOOLS

One claw

READ BEFORE BREATHING

Assemble in a well-ventilated cave with no open hoard nearby. Keep knights, goblins and small children at least one tail-length away. Some adhesives set instantly at dragon temperatures — hold your breath during steps that mention glue.

What's in the box

Check every part before you start. Missing a part? Check under yourself first.

★ PARTS LIST

Ref	Part	Qty
A	Base	1
B	Drum	1
C	Colour trays	3
D	Speed dial	1
H1	Drum pin	2

★ HARDWARE, ACTUAL SIZE

H1 Drum pin
x 2

Steps 1 to 3

Work on a flat surface. Take your time.

1

Set the base down level

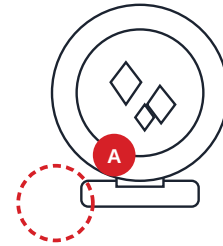

Use the built-in bubble. If the bubble is bubbling, the cave is too hot.

2

Seat the drum

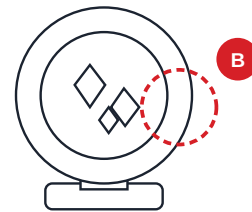

Lower drum B onto the base and slide in both drum pins H1.

3

Clip in the colour trays

Trays C clip to the front, left to right: warm, cool, mysterious.

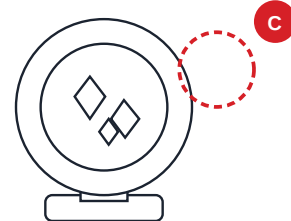

Steps 4 to 6

Nearly there. Resist the urge to breathe on it.

4

Fit the speed dial

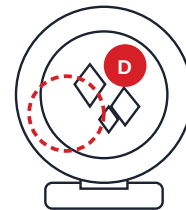

Push dial D onto the shaft until it clicks at Gentle.

5

Load the gems

Fill no more than two-thirds. Overfilled drums polish nothing and sulk.

6

Choose a speed

Gentle for heirlooms, Sparkle for daily wear, Show-off only when guests are present.

★ TROUBLESHOOTING

Problem

Fix

Gems come out dull

Drum is overfilled. Remove a third and try Sparkle.

Loud grinding

A coin is in the drum. Coins go in the Hoardmaster.
