

COIN PUSHERS

Hoardmaster 3000

Assembly Instructions — keep for future reference (and for the next dragon).

TIME

30 minutes

PEOPLE

1 dragon

DIFFICULTY

2 of 5 claws

TOOLS

One claw

READ BEFORE BREATHING

Assemble in a well-ventilated cave with no open hoard nearby. Keep knights, goblins and small children at least one tail-length away. Some adhesives set instantly at dragon temperatures — hold your breath during steps that mention glue.

What's in the box

Check every part before you start. Missing a part? Check under yourself first.

★ HARDWARE, ACTUAL SIZE

H1 Bolt, M8 x 20 (bronze)
x 8

H2 Washer, dragon-safe
x 8

H3 Felt foot
x 4

Steps 1 to 3

Work on a flat surface. Take your time.

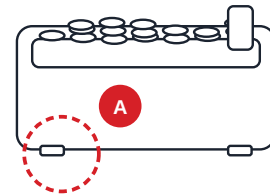

1 Unbox far away from your hoard

Cardboard is flammable. So, respectfully, are you. Lay the parts out on a clear stretch of cave floor.

2 Fit the lane rails

Place rails D into the slots in tray A. Fix each with four bolts H1 and washers H2. Claw-tight only.

3 Slide in the spring cartridges

Push cartridges C into the rails until they click. The arrow on each cartridge points to the front.

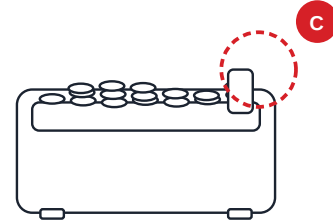

Steps 4 to 6

Nearly there. Resist the urge to breathe on it.

4

Mount the pusher paddle

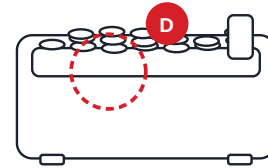

Hook paddle B onto both cartridges. Do not breathe on the glue — it sets instantly at dragon temperatures.

5

Add the end stop and coin guard

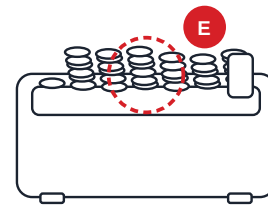

Snap end stop E to the back and coin guard F to the front lip. Stick felt feet H3 under each corner.

6

Load and test

Load coins from the back, front to back. Take one from the front row: the rest should glide forward. Admire. Hoard. Repeat.

★ TROUBLESHOOTING

Problem	Fix
Paddle does not return	A spring cartridge is in backwards — the arrow must point to the front.
Coins spill at the front	Fit coin guard F. It is the curved piece you thought was spare.
Tray feels warm	You are lying on it. This is normal and, frankly, the point.
